PROFESSIONAL SUMMARY

Full-stack Software Engineer with over 10 years of experience designing, developing and maintaining scalable web, mobile and cloud applications. Works end to end across the .NET Core ecosystem, C#, Angular, React, TypeScript and Microsoft Azure, from database and API design through to production deployment pipelines. Combines that engineering background with practical expertise in finance, capital markets and technical/fundamental analysis. Active individual investor and founder of Analizoteka, a proprietary investment analysis platform he designed and continues to develop.

TECHNICAL SKILLS

Frontend & Web	Angular, TypeScript, React, RxJS, JavaScript, HTML5, CSS3, jQuery, REST API
Backend & Languages	C#, .NET / .NET Core, ASP.NET MVC, Entity Framework, PHP, Visual Basic, Swift, Kotlin
Cloud & DevOps	Microsoft Azure, Docker, Kubernetes, CI/CD environment setup
Databases	MS SQL Server, Dataverse, Oracle APEX
Low-Code	Power Apps, Power Automate, Power Pages, Power BI, Google AppSheet, Looker
Tools & Methods	Git, SVN, Bitbucket, Jira, Confluence, Visual Studio, Agile/Scrum, collaboration with PO and UX
Certifications	Microsoft Certified: Power Platform Fundamentals (PL-900)
AI-Assisted Dev	Claude Code, GitHub Copilot

WORK EXPERIENCE

Application Design Analyst — Euroclear Bank

05/2026 – Present

Project: Easyway

- Designed and configured development, test and production environments in Azure Cloud, streamlining application deployment pipelines.
- Minimised system downtime and improved production architecture reliability by implementing environment management best practices.
- Collaborated in an international cross-functional Agile (Scrum) team delivering high-performance, scalable cloud solutions.
- Uses GitHub Copilot daily as part of the standard development workflow, from code generation and refactoring to test scaffolding.

Technologies: Azure, CI/CD, cloud infrastructure, Agile/Scrum, GitHub Copilot

Software Developer — Future Processing

11/2019 – 08/2024

- Sterling Technology (Virtual Data Room):** developed full-stack solutions in .NET Core, React and TypeScript, using container orchestration (Docker, Kubernetes) and REST API communication.

- **Bleepa:** end-to-end development of backend, custom frontend (Angular, TypeScript) and mobile modules (Swift, Kotlin), including code refactoring, REST API integrations and close collaboration with UX/UI designers.
- **Low-Code / Power Platform:** designed and deployed business applications (Power Pages, Power Automate, Power Apps, Power BI) for insurance transaction processing, time tracking, inventory management and survey collection.
- **CNL Software (IP Security Center):** created hardware integration drivers and diagnostic modules in Visual Basic.

Technologies: Angular, TypeScript, React, .NET Core, C#, REST API, Docker, Kubernetes, Power Platform, Dataverse, Swift, Kotlin

Software Developer — Diebold Nixdorf
10/2015 – 10/2019

Project: POS Software

- Developed Point of Sale (POS) software, integrating external hardware peripherals (fiscal printers, EFT, MSR) and loyalty programmes.
- Ensured software compliance with legal and fiscal regulatory requirements across international markets.

Technologies: .NET, C#, MS SQL Server, hardware integration

Software Developer — InSolutions
02/2015 – 09/2015

- Developed and implemented new core features for a desktop CRM platform.

Technologies: .NET, C#, MS SQL

Junior Software Developer — Tenneco
05/2014 – 01/2015

- Created and maintained an internal web-based manual and documentation system for staff.

Technologies: HTML, PHP, JavaScript

OWN PRODUCT & FINTECH PROJECTS

Founder & Lead Software Developer — Analizoteka
09/2024 – Present

analizoteka.azurewebsites.net

- Designed and is developing a proprietary investment analytics portal and community platform for financial analysts and individual investors.
- Implemented analytical modules that compute and visualise key financial ratios and statements for public companies.
- Integrated REST APIs from market data providers to fetch and process real-time stock quotes and macroeconomic indicators.
- Engineered an interactive user interface in Angular and TypeScript to modern UX/UI standards.
- Owns the full lifecycle solo: architecture, backend, frontend, Azure hosting and release process.
- Built the platform with Claude Code as an AI pair programmer, running an AI-assisted development workflow across the whole stack.

Technologies: Angular, TypeScript, C#, .NET Core, Azure, REST API, financial market APIs, Claude Code

EDUCATION

Silesian University of Technology, Gliwice
Bachelor of Engineering in Computer Science

LANGUAGES

Polish — native
English — B2 (Business English)

10/2010 – 05/2014
